

In this issue we will expand a little bit on last month's tips. Last month we touched on Technical Support available through our dealer portal. The portal is accessed through our website, [Phillips & Temro Industries](#). We've now made it easier for technicians to access the troubleshooting manuals and diagnostic tree.

Having credentials and logging into the dealer portal is no longer necessary for technicians needing troubleshooting help. For instant access simply click on this link, [Idle Free Diagnostics](#).

Remember, there are manuals and a diagnostic tree to help you drill down through the symptoms and get you on the right path to locating the root cause.

Troubleshooting Manuals

3.7 eAPU Reference Guide - System Component Information
