

Hello,

For the month of July, we would like to remind everyone of the weight exemption for trucks with an electric APU.

Any truck that utilizes idle elimination technology to promote reduction of fuel use and emissions because of engine idling, may be allowed up to an additional 550 lbs. Each state may have different exemptions. To understand these exemptions please click on the link below.

<https://afdc.energy.gov/fuels/laws/IR>

To be eligible for this exemption, the operator of the vehicle may have to prove:

1. The weight of the APU (by written certificate)
2. By demonstration or certification, that the idle reduction technology is fully functional.
3. Certification of the APU weight must be available to law enforcement officers if the vehicle is found in violation of applicable weight laws.

Please call you dealer or contact us if you need a certification.
